

# Themes for the Final Project

Computer Architecture

Prof. Peter Mikulecky

# A Sample of Themes

- Chapters from the history of computers
  - Here you can choose some particular sub-theme, e.g., processors, memories (internal as well as external), etc.
- Moore's Law – Is it still valid?
- Computer networks
- Interesting applications of computers
- Possible future of computers development
- Man and ICT – co-existence or competition?
- Etc., you can offer also your original theme

# Deadline – April 28, 2019

- A paper (about 15 – 20 pages) elaborating the theme, plus a presentation (about 15 slides), are required in order to pass the course successfully.
- Looking for other supporting sources (web sites, literature) is desirable and recommended.
- Send your papers together with their presentations (preferably PowerPoint) via e-mail to [peter.mikulecky@uhk.cz](mailto:peter.mikulecky@uhk.cz).
